*Household Annual Income includes combined gross income of all adults in the household. (Salaries, child support, disability, etc.)

Use the example below to estimate how much tuition your family may owe. The exact tuition owed (if any) will be issued to you in your award letter.

Suppose your household size is 3 and your household income \$40,500. According to the chart, your family will be required to pay between 21-40% of the tuition. If the tuition of your preferred class is \$275, you'll be required to pay between \$57.75- \$110.

Tuition of Class (\$275) x Tuition Commitment Percentage (21 – 40%, or 0.21 – 0.4) = \$57.75 - \$110
